Fire Departments

Tax payers are demanding and will continue to ask for more services on tighter budgets. This seems to be the one constant, year-in and year-out.

From search and rescue to emergency response, you're asked to wear many hats. SwapLoader wants to show you how to do more with less.

To accomplish all the tax payers' demands requires having the right equipment for the job. Chances are, you're using a multitude of dedicated (single function) trucks to meet these demands today. All too often, these trucks end up being used only part of the year. Unfortunately, equipment that sits for months on end, tend to require a little more upkeep.

With SwapLoader, these seasonal trucks become a thing of the past. One chassis outfitted with a single SwapLoader Hoist becomes a small fleet over night. Simply add a SwapLoader sub-frame to each body and you're on your way to managing the fleet on the tightest of budgets.

**One Truck,
Unlimited Possibilities!**
