Removal & Recycling

Are you tired of standing in the rain, snow, ice or even mud to hook up that old cable hoist? Or what about the daily struggle of having to be dead on, so you can reel the loaded container up and onto the platform? Maybe it's the broken cable that's raised some serious safety concerns or even rendered you helpless in the field.

We'll show you how to do it better, faster and safer with a SwapLoader Hook-lift Hoist System. Haul more loads per day, now that you can switch out containers in under three minutes. The best part is, it's all done from the safety and comfort of the cab.

Need to tarp the loads? No problem. Notice all the different tarp systems you can use with our hook-lift hoists. Container stuck because it's been sitting in the mud, snow or ice for weeks? No problem. SwapLoader utilizes a double acting rear pivot section to provide added breakaway force at the point of lift. Working in tight quarters? No problem. A SwapLoader Hoist can engage a container up to a 60° radius. Maneuvering a container around to achieve exact positioning has never been easier. Ready to dump the load? Again, no problem. All SwapLoader Hoists also operate as true dump trucks and offer extreme dump angles.
